The genuine Bytefence Anti-Malware is a security program by Byte Technologies. Like other anti-malware programs, it is designed to protect Windows PCs from malware, viruses, spyware, trojan, and other online threats. It is legit software and complete anti-malware with both paid and subscription plans available to download on their official website. However, developers quite actively spread Bytefence Anti-Malware via questionable software marketing methods - bundling with other software. This method of marketing gets the programs into a system without the user's approval. Users have reported that once the bundled Bytefence Anti-Malware gets into a system, it changes system settings, including the browser's default search engine to search.bytefence.com. This website redirects user queries to third-party search engines. This suspicious distribution method has earned it the name Bytefence Anti-Malware virus. Most security experts and other antivirus programs identify it as a potentially unwanted program (PUP). You May Like It AVG Internet Security Crack Bytefence Anti-Malware virus summary Name: Bytefence Anti-Malware Developer: Byte Technologies Operating system: Windows Distribution method: software bundling and official website Location: C:\Program Files" subfolder Behavior: changes system performance, browser settings, affect system performance, false virus detections, the process running in the background affects PC speed What does Bytefence Anti-Malware (virus) do Once the Bytefence Anti-Malware virus manages to infiltrate and install on your PC, it alters your browser settings. It then installs on your browsers and hijacks your search engine and search queries by setting up and assigning the new tab URL, homepage, and default search engine settings to search.bytefence.com.
