Follow us @AaiffoBook on Twitter to stay in touch and let us know what you think. First of all I would like to say that I really like this game. It is useful when you get that slight impulse to play on your console, but Aren is not at home to do it, then fills yourself well enough to make you happy. I also like events! Now, what I want to change are just a couple of things ... First of all, if perhaps the players could make the steps during manual playback as when it takes place automatically. This is the lower change though. The best change is when players were to win against players 5-10 points over my team overall, destroying them, then stop and went to fend against the format to the format to the format to the format to the team that makes it almost impossible to beat, so now I finish to lose my opponent because the ai is so fast and my team, even in auto mode, is not able to keep up because I keep my Team is 5-10 weaker overall points than them. Now, I wouldn't have mind if I lose against the to the full credit to win, as my opponent gave up, but instead I have deducted the points to lose their team unbeatable through the Ai. It's not at all right. So if you all could change it where we get complete winning credits when you leave an opponent, if we lose against the AI or NO, which would do this game. 5-star cars !! Please!! Thanks! WTH is this game. It's fun and everything except that I spend hours and hours to play and grind in order not to get anything that is not right. I wish I could play with the controller and if the carrier mode was based on the actual FIFA. Keep this in mind that purchases must be much cheaper. I love the game, but it makes me angry the fact that I have to open a box of UCL players 8 times for a player and from those 8 times not a single player over the 90 my highest general player was an 89 Phil Foden don € ~ "€ t get a fantastic player wrong but after all these years and money I spent in this game (I played fifa from FIFA 12 and I spent over 300 on micro transaction) it only hurts that I can't Receive better or luck quotas. You probably don't worry about what I'm saying, but in the complex love the game and ask you to fix the graphics is! € ~ "€ as fifa 16 same subject subject unpoping color and same game modes / events I have a nostalgic feeling thinking about this please bring him back if the community agrees the packages but please lower the price At least 15% I understand this company to carry out their new ideas but would prefer to have 5 people who give you 100 dollars every (500) or 10 people who give you 75 dollars each (750) This game is actually a fantastic game with features Extraordinary that are only available able to play while on the phone, however this game becomes soooooo annoying and not fun to play more, since Fifa Mobile has 0 matchmaking based on skills, which means that when when when The team has an overall assessment of 90, all your games will be against the minimum team with a total assessment of 105, since this problem continues to continue and the opponents become more difficult without you who are advancing for months, this makes you Loss of the game, Rage stops, and even hurt yourself due to rage problems, as this game ensures that it has 0 matchmaking based on skills to make its users very uncomfortable by playing the game and don't have fun playing the game more and more To get their ranks back, however after playing this game for a couple of months, the maximum people will understand how the matchmaking based on ability is the most important number one in an online game, since the FIFA Mobile misses the Matchmaking skills to lose a lot of players and cause anxiety and anger problems to people who begin to reflect in their character and personality in real life, C he is what made me hate the game even if I liked it, it's because this game makes it so annoying that people spend 5 hours a day as they age and don't just have fun to be anxious and crazy Trying to get their ranks back. Best, the developer, electronic arts, indicated that app's privacy practices may include data management as described below. For more information, see the developer's privacy policy.
