showthread.php? t = 809040 & s = 49168466fef58d08b4f913ffaa2529b & p = 5852355 & viewfull = 1 # post5852355 Hi guys! In the first post here! I had an online look, but I couldn't find any real answers to help ... I have a samsung galaxy s7 board. I just unlocked my phone and received a fake screen, that I scroll and then use my fingerprint as usual .. I have only for an hour or down there, but it's annoying me already! I have not installed all the apps recently. While searching online I showed something about the Explorer es app file, which I have to, I uninstalled. But I still have the same problem! Any help would be very appreciated. I have attached a screenshot of the false release screen. Thanks for your help! Themes attached
• 2017/06/16 07:44 Like 0 Welcome to the forum. Do you have any detergent or recall of the battery / RAM installed in the phone? Each Cheetah Mobile or Du app? Scienceguy Labs like this. 2017/06/16 08:02 Like 1 hi javier, no, it's not my knowledge to everyone. 2017/06/16 08:14 like 0 2017/06/16 08:19 like 0 https://forums.androidcentral.com/showthread.php? t = 809040 & s = 49168466fef58d08b4f913ffaa2529b & p = 5852398 & viewfull = 1 # post5852398 2017/06/16 08:25 like 0 = 49168466fef58d08b4f913ffaa2529b & P = 5.852.407 & Viewfull = 1 # post5852407 Hi Mike, no I'm not using third-party launcher or something similar. After watching under the device administrators who only have Android devices management. Can you explain the way to enter safe mode and leave temporary mode for the return to normality? Many Thabks 06-16-2017 08:34 Like 0 There are many applications that have been pushing ads on the screen lock. None of them in the phone? Go (applications and widgets). TouchPal. Peel Smart Remote. Room Z. Kitty Play. Xender. Es. Amber time ... Another thing. When you uninstall any application, as you did with es, remember before 'STOP force', clear data and then uninstal. This process is to avoid any type of file left behind after uninstalling an application. Underway99 and Cwinkler like this. 2017/06/16 09:51 as 2 Hello, thanks for the advice, I did with es, but work Still Dodnt. I have no other applications listed both = / 2017/06/16 09:38 like 0 yes, you can Find it difficult which app is the culprit. Only an idea, maybe this application can be seen on the overview of recent applications. Restart the phone and if you get the same list ads the screen locks open the most recent applications and see what listed it in there. 2017/06/16 09:51 like 0 Is it possible that it was the result of an update? I downloaded havebt any application in at least a week and a half and this first started today? 2017/06/16 10:03 10:03 0 yes, it could be an update. See in the Play Store which applications have been recently updated, for any eventuality. 2017/06/16 10:05 like 0 I give you a go, thank you for your help! 2017/06/16 10:10 like 0 so I tried this, nothing. I canceled a lot of applications, still without luck. I scanned a malware and there are no problems. More guys tips? that you don't recognize. Do the same in your browser, checking what is included in download. 2017/06/16 12:07 like 0 Another thought. This announcement in your screenshot seems cropped. Can you scroll through the way down? Perhaps you can get more information at the bottom. Also, what happens if you prove that screen for a long time? 2017/06/16 13:01 like 0 Another thing. When you uninstall any application, as you did with es, remember before 'STOP force', clear data and then uninstall. This process is to avoid any type of file left behind after uninstalling an application. Great recall. So many people don't know how to do this. 2017/06/17 12:44 Like 0 Do you have a clean master on your phone? I saw a scroll lock screen like the one with the clean master. 2017/06/17 10:40 like 0 Then boys and girls. It turns out that the problem was caused by morning update on a game that I downloaded called "smash sphere" or something similar. TheBateps followed on the force stopping and deleting data before uninstalling the application and that was what the problem cared for. Thank you all for your help, I hope this saves someone a lot of time and ballaches uninstall applications unnecessarily! 2017/06/18 09:11 as 1 Great news! I'm glad that finally found the culprit and stopped those announcements. Thanks for the follow-up! 2017/06/18 09:24 Like 0 OK, so it's necessary 1) Create your business with a fullscreen theme without stock bar, so as not to appear as an app. To do this, you will create a style in Styles.XML and apply in your manifest.xml Full screen theme for AppCompatActivity 2) for the background image, use an imageview. Imageviews have a scaletype property out of the box that allows you to select different modes: fit crop center, etc ... 3) Create Rest of the logic to insert the pin. And show the different fake images. There is a nice component that really fits your "project", your viewFlipper call, and basically lets you put all the images inside and select the one to show. The root layout will be more or less so: . Poi nell'attività, Ã possibile mostrare lo schermo di blocco e qualsiasi finta pagina: ViewFlipper Mflipper; @Override Public Void OnCreate (Bundle SavedInstancestate) { .. mflipper = (viewflepper) findviewbyid (r.id.flipper); . . . } e per modificare la schermata visualizzata Mflipper.setDisplayedchild (0); // mostrerÃ la schermata di blocco mflipper.setdisplayedchild (1); // mostrerÃ Chrome Mock mflipper.setdisplayedchild (2); // mostrerÃ Wikipedia derisione spero che tu abbia l'idea! Codifica felice. codifica.
