An audit is the inspection, the exam or verification of a person, organization, system, process, company, project or product. It is used to determine authenticity and validity or to ensure compliance with a process. Furthermore, the audit is mainly used in the accounting area to guarantee the validity and reliability of the information contained in the reports and the absence of relevant errors. An audit can be done at any time. A survey is the detailed examination process of activities in order to achieve certain objectives. It is the act of investigating; Or is the study to investigate a particular thing. This is an important factor in journalism to investigate various cases. It is the best way to deal with or identify the case; And make an in-depth report on the case. The investigations are conducted in suspicious places. The main objective is to investigate the accounts and the financial aspects of a company and on the total aspects of the same. Comparison between audits and investigation: audit investigation Description Audit means inspection, examination or verification of a person, an organization, a system, a process, a company, a project or a product. The survey is an investigation, or the act of in-depth examination of activities in order to achieve certain objectives. The owners' audit is conducted only on behalf of the owners and make the appointment. The inquiry can be carried out by the owner of the company or an exterior. Purpose Determine the true and correct vision. Varia from business to enterprise process routine process The survey is not a regular scope process comprises only an examination of the accounts of a company includes an account examination but also includes a survey on other issues connected with the purpose For which time is carried out year or six months May concerns several years employees does not first examine personally can personally examine sequence usually conducted before the investigation of the accounts conducted after the audit of the person accounts that carries out the work the review must be carried out by A granted accountant The survey can also be carried out by an unauthorized accounting accounting obligations the review is mandatory by law there are no obligations of this type as regards the investigation the audit and the investigation may seem similar. But they differ in terms of commitment. In general, auditing checks the legitimacy of information or processes. At the same time, the survey consists of a careful examination of documents and tests to try a specific fact. Although both have been considered part of the organization's activities to ensure a higher level of procedures or processes, one Survey Af) rare. Investigative auditing is excluded only depending on the results of the audit, especially when some cases have been shown to be suspicious of activities vs InvestigationThe difference between Auditing and Investigation is that the audit is examining andTo the accounts books of a company, while the investigation is a process of knowing a certain fact, truth or accident. Auditing requires general inspection while inquiries require focus and thorough examination. The auditing is conducted annually but the investigation is conducted according to the customer's requirement. They also differ in terms of people involved in auditing and investigation. Auditing only requires rental auditors while the survey requires people with skills both in fields of investigation and accounting. A auditor is a person authorized to verify or review the accuracy of financial records while an investigator carries out an investigation or a formal survey table. InvestigaMeterAmeter of comparisonAditingInvestigationDefinitionis an examination or inspection of records, processes and activities to ensure compliance and integrity. An in-depth investigation to prove a particular fact. ExaminationDeneral exam .Critic and extended. Build and maintain confidence within an entity or group, prevents fraudulent activities and always guarantee high standards and processes is always confirmed. This is conducted only when there is a potential dishonesty on a certain fact. Antum of ReportGeneralConfidentialMandatoryyesNoperforming EntitiesInternal or Account Auditor/AccolagantSpertsSerts is an auditing? A controller or audit is a Ction inspection or examination of processes, activities and records to ensure compliance or requirements. The maximum audit refers to financial control, in which a series of accounts or corporate books, documents or records inspected to determine whether they are accurate and following the rules and laws. An auditing is required to help create trust and trust within a company or a specific entity that requires public trust. For companies, an internal audit takes place at least annually to ensure fraud prevention. There are at least nine (9) different types of audits: the internal audit – takes place within a company, in the sense that the auditor is working under the same community. Most companies use the internal audit to check business finances and evaluate operational processes to ensure compliance. External audit - it was conducted by a third party entity that is not connected to the Company or a verified person. Most common external auditors are someone from an independent accounting company, IRS or tax agency. Financial audit - one of the most common types of audits. An external auditor is commonly assumed to conduct a financial audit in a company to ensure the accuracy of business documents and financial statements. An auditor inspects all that is related to financial issues, it can be commercial transactions, creditors or investors. Open audit - has the sameAs an internal audit. The operating audit analyzes the objectives, processes, procedures and the results of the company. Mayors can be both internal and external external excellence. "It refers to compliance with specific business processes and rules against external laws. The audit of books pays "is an internal type of audit conducted by a auditor to ensure the accuracy of payroll. Auditing involves employee wages, taxes, deductions from benefits, employee information, and deemed them. IRS fiscal audit "is conducted to ensure the accuracy of the tax returns. Make sure that there are no discrepancies or that the company has not paid over or subpaid taxes. Information System Audit «» refers to an Audit for software companies and IT.Pay Audit «» refers to the identification of wage discrepancies within employees. What is an investigation? An investigation refers to an examination or research action to discover something. An audit survey, however, refers to the examination of accounts, accounting books or financial procedures to discover irregularities and follow the movements of assets and funds within an organization. It is a field of competence that deals with the qualification and prevention of potential fraud, indebted ownership of funds and mismanagement, in relation to financial and operational activities. An investigation as such uses almost all types of methods to check suspicious discrepancies of corporate resources. Unlike Audit, which is imperative, the investigative audit is discretionary. It is often conducted in the presence of potential financial discrepancies, illicit use of corporate funds and undue appropriation. The Investigative Audit includes the examination of the following aspects: Financial and operational processes within an organization. Control and prevention mechanisms. Audit tests of internal control systems and identification of financial gaps. Accounting and tax contributions, mergers, acquisitions, investments and other business activities. Main differences between audit and surveyWhile auditing is an examination of documents, books, records and processes; The survey is a broader examination of audit results to establish a more certain fact. internal or external auditors or accounting from an accounting company conducts audits. At the same time, experts or investigators were hired for the investigation as it requires more extensive methodologies. The audit is mandatory, especially in an organization made up of a board of directors. At the same time, an investigation is conducted indiscreetly only if unusual activities that involve financial resources are not transparent. Unlike the audit, which has a limited focus and scope, the investigative audit may have a wider scope and department. The audit can be programmed while an investigation can be carried out surprisingly at any time. Frequently Asked Questions (FAQ) On the audit and audit and investigationWhat are the objectives of an investigationIt is conducted to try a particular fact or to establish a truth. The main objectives of a survey are: to find an error in the books accounting for a specific specific fact The truth To differentiate fact from fiction To find the causes behind the loss in a company What is the difference between a tax audit and a tax investigation? The main difference between a tax audit and a tax investigation is that: Tax audit à All books, documents and records in the account are checked to ensure that the tax and correct income are reported by the taxpayer. Tax investigation à Generally carried out by surprise and only specific documents, books and records are critically checked to ensure that the taxpayer is not trying to evade the tax by any unfair means.
