Tor con index for tomorrow

Tor con index for tomorrow

What is the torcon index for today. Current torcon index. Torcon index for tomorrow. What happened to the torcon index.

I'm not a fan of what became of The Weather Channel after NBC bought it. The station quickly began a sucking spiral which was a slap in the face to both spectators and science. But I have to give them credit when it's due: when they stick to the weather, The Weather Channel is surprisingly good. A couple of years ago, the excellent TWC weather expert Dr. Greg Forbes started making his "TOR:CON" forecasts. The TOR:CON, short for "Tuna Status Index", is an innovative way of boiling the threat for tornadoes in a general area ("South Arkansas", for example) based on a scale of 0 to 10, with 10 indicating a 100% chance for a tornado within 50 miles of any given point in the area. TOR:CON has done wonders to convey the threat of severe weather to the public in a way they can actually understand it. The Storm Prediction Center (SPC) produces very accurate weather forecasts, but the wording of their forecasts is sometimes confusing to the public. Dr. Forbes assigns TOR:CON values by studying the same model data that the Storm Prediction Center (and every other meteorologist) uses to write their forecasts, but generalizing it to a fairly accurate 0-10 scale is an incredibly useful way to get the word out in a way that people will buy and use to act. The great thing about TOR: CON is that it's a standardized index that isn't affected by TV ratings or what would generate the most social media hype. Unlike the names of TWC's winter storms or their new "STORM:CON" index - a similar but television-driven index that analyzes the hyped-up impact a winter storm will have on a city - the values hold the same meaning for everyone. 3/10 TOR:CON in Oklahoma City. It's based on science rather than on hype and evaluation, and that's what makes it good. If only they had better ideas like this, they wouldn't have taken almost all the criticism they're making now. [Screenshot off The weather channel] Have you ever released one and what parameters are needed to justify a 10 build. a short answer to your question is yes, we have twice well and it occurred only during the most severe weather outbreaks. What happened to Dr. Greg Forbes on the Weather Channel announced on its Facebook page that Forbes had decided to move from full-time to part-time, due in part to its "colon cancer scare" three vears earlier. What's a Torcon 7? The TORCON is up to 7 for northern Alabama, which means there is a 70% chance of a tornado within 50 miles of any location in the indicated area. Potentially damaging straight winds and hail are also possible through the afternoon and evening. # What's the level taller peat? Severe Weather Expert, Dr. Greg Forbes developed the TOR:CON index to estimate the risk of a tornado in a given day or night near your area. The TOR:CON index ranges from 0 to 10. Multiply the10 to get your odds of a tornado within 50 miles of a location. What does "Torcon" mean? Tornado Conditions Table of Contents What is the torconic scale? The weather channel has been providing its Tornado Condition Index, or TORCON, to the public for over a decade. It is a scale 1-10 threatA¢A¦ the greater the number, the greater the threat to tornadoes. Watch The Weather Channel this severe season and you'll see TORCON used! Who are the weather channel meteorologists? Our personalities Jacqui Jeras. Meteorologist on camera. Tevin Wooten. Meteorologist on camera. Felicia Combs. Meteorologist and host, Liana Brackett. Meteorologist and co-host, "AMHQ" Mike Bettes. On-camera meteorologist and host, Liana Brackett. Meteorologist on camera. I'm Chris Bruin. I'm Jim Cantore. Who's the new Weather Channel girl? Jen Carfagno How much is the weather channel worth? The purchase price for the weather channel and Local Now was reported \$300 million, according to Bloomberg. Entertainment Studios didn't confirm that figure. This is well below the \$3.5 billion that Comcast NBC Universal and the investment companies have paid Landmark Communications for The Weather Co. Where is Maria LaRosa now? LaRosa lives with her family in New Jersey. How old is LaRosa? 44 years old (November 7, 1976) Who is the husband of Stephanie Abrams? He co-hosted The Weather Channel On The Radar from 2012 to 2013 and Morning Rush (formerly Your Weather Today) on weekdays from 2009 to 2014. Abrams is now co-host of AMHQ with Jen Carfagno and Jim Cantore. What's Jen Carfagno's salary? \$300,000 a year How much do the Weather Channel Salaries Å" 7 reported salaries \$63,203/year Broadcast Systems Engineer II salaries \$47,592/year Account Manager salaries Å" 6 reported salaries \$61,025/year Salaries Vice President Å" 6 reported salaries \$203, 858/year Where did Jen Carfagno go to college? Penn State University What is Lauren Scala's salary? She joined NBC in 2010 as a host and reporter. Lauren Scala currently has a salary in excess of \$100,000 and her net worth is reported to be \$1 million. How old is Felicia Combs? 29 How much does Revnolds Wolf make? Revnolds Wolf as Net Worth. Revnolds works hard and is talented when it comes to his job. He has undoubtedly earned a fair amount of equity with \$90,000 in salary as a forecaster. Is Revnolds Wolf still on the weather channel? Revnolds Scott Wolf (born March 16, 1970) is an American meteorologist and journalist currently employed for The Weather Channel, and previously for CNN, where weather forecasts could be viewed on CNN Saturday Morning, CNN Sunday Morning and the weekend editions of the CNN Newsroom. Felicia Did she get married? All copies found will be reported. His fans often wonder if he has a relationship. Report. Today's Combs is still single, as she has stated several times in interviews and on her social media. Is Felicia Day Married Yes Children Calliope Maeve Net Worth est. \$1.5 million How much does Felicia Combs make? Felicia Combs Salary Combs receives an average annual salary of \$52,000. This is according to WPTV News conductors/reporter salaries. Where did Felicia Combs go? She enjoyed her 2.5 years as a meteorologist on weekdays in Macon before moving to the Midwest for her next job. Felicia moved to Springfield, Missouri, where she spent two years predicting the changing weather of Ozarka. What is the Liana Brackett ethnic group? His family later moved to Portland, Oregon. The Californian weather girl is of mixed ethnicity as well as she has a Mexican heritage. Looking at her academic background, it's fair to say that Brackett was confident of her career path very early on. Where's Jacqui Jeras from? Jacqui grew up in the Midwest with roots in Wisconsin and Minnesota. There, she was fascinated by all kinds of weather, but of course she loves more a beautiful snowstorm! The tropics are almost second. In his spare time, Jacqui enjoys running, cycling, hiking and spending time with his family. Where is the weather channel transmitted from? Atlanta What happened to Liana Brackett? Weather Channel announced today that meteorologist Liana Brackett will host Quibi's "WEATHER TODAY" from her role as meteorologist on-camera for "WEEKEND RECHARGE" for the network. We've detected that JavaScript is disabled in this browser. Please enable JavaScript or switch to a supported browser to continue using twitter.com. You can see a list of supported browsers in our Help Center. Help Center by Dr. Greg Forbes, Tornado Expert What is the TOR:CON Index? A"TOR:CON Value Descriptions 8: High probability of a tornado 6: Moderate probability of a tornado 4: Low probability of a tornado nearby, but possible hail and/or strong gusts of wind 0: Near-z Updated: 25 April 2011 14:00 ET¦ Â" Developed by Dr. Greg Forbes, (Find him on Facebook) The TOR:CON index is an estimate of the probability of a tornado activity occurring in a given period of time. The areas listed below have an above-average risk of severe thunderstorms with harmful winds, hail and/or tornadoes for the specified days. Severe weather overview On Monday an upper trough reaches the humidity of the Gulf of Mexico and generates a shallow surface. Wind shear and instability in front of it will be very favorable for tornadoes (and worsen flood troubles). A low surface above OK and heading north-east Monday and Tuesday, from another that is formed in the north TX Tuesday, from another that is formed in the north TX Tuesday evening and still goes north-east. Wednesday. North to N North to Nor AR & LA... as they are in range 7. At this time, at 6:25 am, it is very, very windy, dark gray... And the birds I complained about this morning were silent. Not a good sign. thanks mary ann we have been under warnings of tornado a lot for this period of the year in our area Cruise is a wonderful way to enjoy the pension. KK - I say that when it's too much! I like this simple formula for tornado watches; thanks for the info. info.
