Image of the Mudi Case Midi Roland Sound Sound Canvas SOUNDFONT to imitate the Roland SC-55 clan. Developed by the Patch93 user in Doomworld.com, but originally provided only in the .sfpack proprietary format. Converted to the SF2 format (now with limitations). The last known version, posted on October 7, 2016. This soundfont is good for games like doom, but it lacks GS support. It is only called the so-called shades (meaning that there are variation shades, only the bank 0 is implemented). Author: patch93. Adapted text. This SoundFont has been designed for users of the SoundFont Midi Player 5 program and is already valid to be used in Roland E-A7 arrangers keyboards that must be accompanied by the AB or MIDI type printer cable USB, where you must need the E-A7 Tone Manager program for Windows 7, 8.1 and 10 installed on your computer.
