The words ÁefreeÁe and ÁeXbox 360Áe are like J.D. Salinger and a bunch of paparazzi never seen together. Still, Popular Science has just invoked them with this curious homebrew trick that could (and hasn't tested, I stress) save you the £100 from Microsoft-addicted consumers for its xbox 360 USB vanilla wireless adapter. It just costs you the backup router that can (and I, once again, may be stressed) have by chance lying down by a. Otherwise, the article suggests that you can purchase something for \$15 to \$50 between points like eBay and Amazon, which is more in line with what you pay for a third-party wireless USB adapter at a reasonable price for a security or portable computer. Starting from the principle that your cheap routerÁ© supported (there is a list), all you have to do is Á© flash it with this tool (called DD-WRT) and prÁ©-do, retire-that-that-mile-long-network-cable-o-! Of course, if you already have an extra wireless router, you can simply plug it into your network, connect the 360 with the same bit of abbreviated RJ45 wiring, and accomplish the same thing (well, assuming the boxes speak the same language). If I understand what the DD-WRT utility adds here, Á© the "allow dupine wireless routers with Broadcom or Atheros chip reference design to connect to each other". The XBOX 360 may probably be this year's Cabbage Doll (remember those?) and its chances of getting one are getting thinner every second. Thanks to God for the XBox360 Inventory Locator!
