4.06 Other			8.12		

All About Your Teacher!

a little about me...

my favorites

Welcome to Kindergarten in Km. I'm I am so happy to meet you! My name is Lauren Caldwell and this is my 11th year of teaching! My teaching experience includes 4th, 5th, and Kindergarten. In my opinion, this first year in school is one of the most special! What I enjoy most about my job is the relationships I build with children and parents alike. In Kindergarten, we enter the year as strangers, and leave as family! Our classroom is a safe place for every child to feel loved, nurtured, and encouraged along their academic (and social) journey. I feel blessed to be a part of this foundational year for your child's education. I hope to be partners with you this year in providing the best developmental experience for their first year in school!

Keep up with us!

Class Dojo: *type your class id & code*
SeeSaw: *type your account code*

*Or include a QR code to direct parents to a connect site or classroom webpage!

Sometimes Stripped, Always Riced & Coffee Obsessed

Give me a Starbucks in the dollar spot of Target and I am one happy teacher! Some of my favorite things include my family and my food obs. - Murphy and Marley. I love hunting for the best deals on my favorite items of my household! My hobbies include cooking, crafting, quilting, and making memories with friends and family.

Stay in touch!

Messaging on ClassDojo is the quickest and most common way to communicate! Otherwise you can reach me through email or phone.

Phone: (505) 535-555

Best times: 8:00-8:30 am or after 4

The medical history that we could find about him includes a case of COPD. Recommendation I'd recommend that Mr. Dickerson is treated with a 12-lead. Recommendation With the assessment performed on her, I would highly recommend an infectious disease consult to be performed on her. He is a 78-year old male with a forgetful memory. His skin is perfectly intact. He has also been feeling quite confused and feeble. Neither is he in isolation. He is resting comfortably in his room with a blood pressure of 120/80. I use this Report Sheet every single day and it really keeps me on track. Are there are any other tests that you would like to order for Mr. Dickerson. How to do the best and quickest morning head to toe assessments, give great report, organize your shift so you never forget anything, how to be confident in a code and impress your colleagues, how to talk to doctors to get them to love and respect you and so much more! If interested, email me at megforit@gmail.com! MEGFORIT Free Nursing Print-Outs The print outs that I share with you on this site are the ones that I personally created and actually use. If you are a nursing or nursing student and wondering How to give report? This is for you! Giving an effective report is critical and can save so much time. You may even leave on time! (One can dream!) Where do you get it | Hand off nursing report sheet I'm so glad you have stopped by my little corner of the internet for some nursing resources! Click the button at the bottom to download this FREE nursing report sheet and then watch the video below. Don't forget to check out my other articles that will be helpful to you! How to Pass the NCLEX eBook! How to Successfully Manage Nightshift. B Background The following provides a background insight into the underlying problems: John Doe was admitted to our care with a case of pneumonia. Nursing Report Sheet | Part of the Ultimate Guide to Bedside Nursing This report sheet is part of my "Ultimate Guide to Bedside Nursing" eBook where I give new grads all the tools, print outs and advice that you need to be the most impressive nurse on your floor. He was admitted yesterday. I am also working on a course to be your virtual preceptor and make sure you have all the tools to be successful. SBAR Examples for Nursing Students An SBAR example for nursing students are given below. Scenario 1: There is a patient who might have had some changes in his health conditions. He does not have any allergies. Mr. Dickerson also has a history of being associated with drugs such as Coumadin and Digoxin consuming doses of 5 mg/day and 0.25 mg/day respectively. Mr. Phillips lives at a distance of 30 miles from the hospital. His A-fib rates have been touching rates as high as 90. That is why I developed this comprehensive FREE PRINT OUT Nursing Report Sheet Download after 10 years of bedside nursing! It's perfect and can be used on any hospital floor, no matter the specialty. Who am I? Mr. Phil has been accommodated in Room 150. My name is Meg and I've been a nurse for 10 years with a BSN in Nursing from Florida International University. B Background The following provides a background insight into the underlying problems: Mr. Phillips arrived for an appointment at 10:30 AM in the morning today. Since then, he has been going in and out of controlled A-fib. This makes it difficult for him to commute to and from the hospital on a frequent basis. However, since his hip surgery, Mr. Dickerson has not consumed any Coumadin or Digoxin. I have tons of Nursing related content - so go take a look around! Top Nursing Gear | What to Buy, The Essentials for any Bedside Nurse Come watch my video where I verbally go through the entire report sheet and explain why the order and content matters! SBAR is a technique used in nursing fields for easy communication amongst the workers in the health care for providing details regarding a patient's condition. Should the Digoxin and Coumadin be continued? This led to him receiving 2 units. He is a 58-year old man who has looks severely pale and has been sweating uncontrollably. B Background The following provides a background insight into the underlying problems: He has disclosed a history of HTN. He has previously been admitted for a GI bleed. A Assessment Mr. Phil seems to be inflicted with an active bleed situation. SBAR Nursing Report Template Given below is a basic form of an SBAR Nursing Template. We don't know whether the mistake made in the appointment times was due to the patient or due to the call center. Also, if there are any changes, do you want me to notify you? Details of SBAR Template for Nursing Students Now, let us have a look at few of the SBAR Templates for Nursing Students available. A Assessment Initial assessment of John Doe provides us with the following details: All of his vital signs are completely stable. R Recommendation I would recommend for Mr. Phil to be checked with the means of an electrocardiogram. In spite of this, we cannot rule out the possibility of MI. He is doesn't seem to be feverish and neither does he seem to be in any form of pain. I will show you step by step how to be the best new hire on your floor. The doctor has a 1+ appointment available on his schedule. His vital signs have been recorded at BP 90/50, pulse value was 120. However, we seem to be out of troponin or a recent H&H. It would be apt for us to perform his check-up as there are certain free times in the doctor's schedule. This allows an easy methodology for communication between team members that ensures the fostering of teamwork. The reason for the mistake is unknown. A Assessment This morning, Mr. Dickerson went into an uncontrolled A-fib. A nurse wants to report this change in condition to the doctor. Time management is everything! When you manage your time well, you can have a much better shift. Also get some free examples and samples with detailed information to make you more clear about our templates. A Assessment Mr. Phillips seems to face a lot of trouble while commuting to and from the hospital. Such an SBAR Nursing Report Template can be used for informing a physician about a critical situation. | Hand off nursing report sheet I would love to introduce myself. I've seen it all. As of the moment, John Doe has two IV's in the right AC which was plugged in two days ago. Her urine outputs also seem to be good. S Situation Dr. Jeffries, this is Jeanie Shanon calling from the Critical Care Unit. Also, his pulses are palpable. SBAR Nursing Handoff Example An example of an SBAR nursing handoff example is given below: S Situation We have a John Doe patient in our care. Currently, he is asymptomatic and his vital signs seem to normal than before. Many new nurses struggle with giving report because they are overwhelmed with information and other nurses use "report time" for bullying. B Background The following provides a background insight into the underlying problems: Mr. Dickerson underwent hip surgery two days back. His lungs seem to have diminished bilaterally. All the templates are absolutely free to download and print. Another example of a sample SBAR Nursing Report is: S Situation Mr. Phillips, a patient, arrived for an appointment on the day before the appointment was scheduled. Also, he is provided with a regular diet. Healthcare is a wonderfully exhausting and rewarding field, I absolutely love being a nurse and teaching other nurses how to be the best they can be. However, I would really recommend you to evaluate him right away. Previously, Mr. Dickerson has had a history of A-fib. SBAR or Situation, Background, Assessment, and Recommendation is a highly useful mechanism in providing adequate communication techniques during critical situations that require an immediate response from the physician. Apart from this, the doctor's partner has some open times on his schedule. R Recommendation It would be recommended that the doctor with the 1+ time or his hall partner who has open times see the patient. His appointment was scheduled for tomorrow at 10:30 AM. Apart from this, he has also been complaining of pain in his chest. I have worked all over healthcare, from rehabs to Emergency rooms, Telemetry floors to Cardiovascular Step-down units. His last crit which was recorded two hours ago was 31. Right now, he is on a 2L nasal cannula which is currently sating at 95%. His heart rate was recorded to be in between 120-130. S Situation Mr. Dickerson, who is an ICU patient in room 5 at our hospital has had a change in his heart rhythm. His bowel sounds also seem to be active as recorded during his last bowel movement today. In case of any changes in his condition, would you like me to call and notify of any other notification? John Doe also has a history of diabetes. So, What are we waiting for!! Let's get started.
