Some of these softwares are available on the computer when you buy, but others are optional. Unless we are also programmers, it is unlikely to find programming languages. Proprietary systems are usually constructed with the help of a variant of the UNIX 2 operating system. Application software: A normal user rarely can see the operating system or to work with it. There is a new class of languages that are being used for cell phones. Understanding computer software is needed if you would like to make your computer work advantageously for you. It can be a surprise for some that there are other operating systems used à € à €
