The addition of Draco Meteor after the day of the Exeggcute Research The event in April 2022 is a surprising but not very impressive move for Alolan EXEGGUTOR. The dragon tail in general works better than the bullet seed due to the significant difference in the production of damage. The seed bomb is the main charge move used by Alolan EXEGGUTOR, which requires only 40 energy that allows you to be used frequently and even bait shields. Dragon Pulse allows our high dragon tree to inflict relatively neutral damage and threaten other dragon -type Pokemon.
