Ludo is a classic strategy board game played by two to four players alone or in partnership. Ludo derives from the Indian game of Pachisi, played around the 6th century. It's a viral game played all over the world. The best thing about the game is that all ages can easily learn and play ludo online and offline. The board game is perfect for playing with family and friends. In addition, advances in technology have made playing Ludo more convenient - all you need is a computer or mobile device to play Ludo and make money. Ludo board game has evolved into online multiplayer or play alone, communicate with people via voice chat. Download it from the App Store in India. The rules of Ludo are quite simple and easy to understand. The Ludo board is divided into four quarters, each a different color: Red, blue, yellow and green. Each player chooses which colored quadrant to play. Then that player receives checkers of the same color as the selected quadrant and takes turns rolling the dice, completing the game objective. In Ludo, each player has four chips and competes with them from start to finish. Players move their chips around the board according to the number rolled. While rolling the dice depends on the number of players, Ludo also requires a lot of strategy and observation from players to move their chips. It is a game that has a rich history and has been played offline since ancient times. To date, it is one of the most played games. The ludo game has shifted from indoor games to online platforms, making it easy for ludo lovers to play the game with family members and friends no matter where they are. The latest update is very good, I liked everything about it. The ability to change players in npl should be available as ipl... Saving statistics after starting a new tournament Hello, thank you for writing to us! If possible, we will work with our development team on your suggestions for future updates. We try to accommodate fan requests, but please note that we can only do a few updates at a time, not all at once. Thanks and Regards WCC2 Team I bought the ad-free version. Since the last update in 2018, it has become very difficult to take wickets in Test cricket as fielders close to the batsman's positions simply retreat whenever the batsman hits the ball in their direction. Then there is no point in setting typical aggressive test cricket pitches. In limited overs cricket, they sometimes fail. Please fix this problem. Before you answer, at least read what my problem is .... my problem isPurchase... is game development. It's not about feeling authentic. The game is really great, no question. But if you've watched Test Cricket, aggressive spotting/catching positions are an important factor in Test Cricket. Even a slipping fielder falls when the ball touches his side. This is funny. If you want to improve the pace of the game, you can program the batsmen not to hit the fielders more often. Please discuss this matter with real cricket experts and I am sure you will understand what I am trying to explain. Many Thanks. Hello, thank you for writing to us! We have considered your suggestions and will consider them for future launches. Sincerely, WCC 2 Team Hey, Also try to update your career stats like runs, fifties etc whenever there is a new hitter or bowler. Try adding Ashes, Big Bash, County Cricket Tournament and the difference in the number of strikes, while even an 11 batsman can easily hit a six. Each player must have their own shots, just like in reality. It would be great to have a selection of racquets (MRF, SG, SPARTAN, etc.) with different power levels, balls, shapes, etc. that we can buy with coins, e.g. B. real 18 euro cricket. And add some features for the player to switch joystick when needed and add joystick powerlife to the game screen. And the referee can request to change the ball during the game, etc. And some graphic improvements, like the Sachin saga would be amazing. Please improve IPL teams and international teams, practice bowling and net battles, you are great and can achieve anything and everything. I love this game man! Hats off guys... please make sure we can get all these features with your surprise update. I'm the biggest fan of this game. Please add these features. Hello, thank you for writing to us! We have considered your suggestions and will consider them in future versions.
