3.00/5 (6 votes cast) Hi everyone... If you're like me and just want to have fun in a game that kicks occasionally, this is for you. This guide explains how to change the APK for FieldRunners HD. I won't be presenting or distributing the APK, so don't ask. First you need an APK file that you bought on the Android market. If you have apps in the Amazon App Store, this will not work. First change the extension of the file from APK to .zip. Then rip the contents of the file in the new Desktop folder. (You can name the folder as you wish.) Open the Resources > Data > Highlesolution > Maps here you will find 4 folders.... Ulas, Crossroads, Drolllands, Grasslands open the level you want to change. (In this guide I use the meadows as an example) Search files with ~map.mp3. Open this file with a text maker like Notes. You look a few lines in the file to see "starringhealth =" 20 "beginresources =" 15. Change these values in each. If you want to set the details of the towers, you can do that too. It's fun to create a weapon that kills everything at once. Open the folder. Asset > Data > HighResolution > Torri. Locate the tower you want to edit and open, and open the ~Tower.mp3 file in the text maker, for example Notebook. Each tower has one of these files. 129 "> For each level of the tower there will be such a line as this, 1,2 and 3. Change the values in what you want, the bigger the weapon. Now that you have regulated all the maps and towers, which you want.And the folders you extracted from the zip file and create a new zip file..APK.Now you need to sign a file,you need to learn it in another post.Once you have signed the file , you will be installed and you will see the changes in the game. Good luck to you, do not announce APK and responsibly. Explain how to change the APK for FieldRunners HD. I will not deliver them and I will not distribute them3.00/5 (6 votes) Hi all...... If you're like me and want to beat games that sometimes bore you, then this is for you. This guide explains how to modify FieldRunners HD APK. I don't provide or distribute APKs so don't ask. First, you need an APK file that you purchased from the Android Market. If you have APK from Amazon App Store it will not work. First, change the file extension from APK to .zip. Then extract the contents of the file to a new folder on your desktop. (You can name the folder whatever you want) Open Assets > Data > HighResolution > Maps folder Here you will find 4 folders... Cave, Crossroad, Terrain, Meadow, open the folder for the level you want to edit. (I'll use plants as an example for this guide) Look for files with the ~map.mp3 extension. Open this file with a text editor such as Notepad. You will see "startuhealth =" 20 "startingResources =" 15 " in a few lines in the file. Change these values to your liking. If you want to change the properties of the towers, you can also enjoy making weapons. Open Assets>Data>HighResolution>Towers folder. Browse the tower you want to edit and Open the ~Tower.mp3 file in a text editor such as Notepad. Each tower will have one of the following: search for with these files open. At each level of the tower, this line will be 1,2 and 3. Values The higher the number, the stronger it will be and save it on your desktop or wherever you can find it Now change the file extension from .zip to .apk of the new file. Now you need to sign the file, you need to find out in another letter. After the file is signed, it will be installed and you will see the changes in the game. Good luck in winning, don't post apk here and please act responsibly. Reactions: EMY81059, SOJYETI2, WWJOSHDEW and 6 more Hi everyone.......if you're like me and want to beat hell in a game that sometimes excels at you then this is for you. This guide explains how to modify FieldRunners HD APK. I do not deliver or distributeSo please don't ask. Good luck, don't post apk here and be responsible. Obviously I don't need the apk ... I bought the game ... but where to find it on my device ??? I use SGSII ... Thank you. Ouch ... and I bought the game not on Amazon, but through Google Market. Last modified: September 1, 2011 The APK is on the phone under data/apps. You need to be rooted to get there. If you bought the game but you don't have root, Google can help you. Response: AXXONX APK is on the phone under data/apps. You need to be rooted to get there. If you bought the game but you don't have root, Google can help you. Dude... I was functional... it's rooting, I'm using Racine explorer. Everything works until I try to install the signed APK. I used Andoid to order to sign the APK ... it doesn't work. By the way, I used the apk I found in the Miui Backup folder because I couldn't find the apk in the data/app ... I know, it's weird ... weird. .. I just traveled on Miui and I did not find the APK installed as well. I'll warn you when I find it. Modify - apk found by MiUi. It's MNT/ASEC/COM.Subatomicstudios.com. Last Modified: September 2, 2011 Response: Axxonx Strange .... just checked MiUi and couldn't flash the installed APK. I'll warn you when I find it. Well, I already found it in my bases ... When I install this APK, it works. But when I change the files and so on, the APK can't be installed anymore.......weird....I just traveled around MiUi and I can't find the apk is installed. I'll warn you when I find it. Modify - apk found by MiUi. It's MNT/ASEC/COM.Subatomicstudios.com. Ok ... I'll try to change that! Thank you, friend!!! EDIT: Honestly, I think it's the same APK as Muiu in the backup file... Edit 2: No, it's called something else... Hope it works this time!!! Thank you, friend!!! Last modified: September 2, 2011 Weird .... just went through Miui and can't even find an APK installed. I'll warn you when I find it. Modify - apk found by MiUi. It's MNT/ASEC/COM.Subatomicstudios.com. So when I changed files and such, should I disconnect the game? Or are there other files that I need to delete??? I have Amazon and it doesn't work. Can anyone go to the commercial version or this version? I've already downloaded a few APKs and it seems to be the Amazon version based on the file content. So I have the APK market but I can't sign it properly. Try zipsign 2 and installWell, but the application cannot be open. I tried Signapk.exe and it installed fine, but I got used to the discovery. As soon as I estimate the size, it changes to more than 2 MB and is not installed. I signed it. What will lead to a change in size? It should be multiple bytes. Make sure you pull without squeaking. Make sure you pull without squeaking. Sent from HTC HD2 via Tapatalk: Axxonx reactions. I did a lot of research and I can't get the guy to sign 7zip, Winrar, Win Zip, Droid Explorer, Ninja Morph .... I followed the instructions and didn't install. Anyone out there with success? It should be multiple bytes. Make sure you pull without squeaking. Make sure you pull without squeaking. Sent from my SCH-I500 via XDA I did a lot of polling and I can't sign the guy using 7zip, Winrar, Win Zip, Droid Explorer, Ninja Morph .... I followed the instructions and didn't build it in Terrain Anyone out there with success ? Sent from my SCH-I500 via XDA, you need an application for a signature. Finally, I learned how to do it. So if you want to replace all the files, for example (I just added 99999 seeds): grüslands_exted ~ map.mp3 grasslands ~ map.mp3 crossoads_exted ~ map.mp3 crossoads ~ map.mp3, then drag them without compression (or "save " Then use for signature (this can be used to sign any APK file): mirrors D=Ghyx0prw .com/files/f3gt3bk/signapk-with-bat.zip :. you should have a folder called "tiinapk", вот инструкция, как я подписал: 1. Скопируйте файл APK в C: \ tivApk 2. Переименуйте файл APK в "Application.apk", а затем начните подписать аааааaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaapi . Apk.bat ». Это создаст подписание приложения. APK в той the same Mape. The package file can be used in administrative Nom mode ms if it doesn't work the first time. Java is required and I think most people already have it on their computer. Edit: It took me a lot of research to find this out. I can provide a simpler overview for people to watch. Answer: I'm only interested in Vaporini, but wouldn't it be easier to use something like Gamecih? It seems less stressful and easier. If you ever used cheats before then Gamecih should be your toy. Will this message appear when I tried to install the APK "There was a problem parsing the packages". Can you all solve my problem? Can someone send a modified apk file as a multilaader? I'm trying with version 1.04 and I can't. Thank you like magic. Now I can hit my machine gunsShooting thanks to pop. He worked as a champion. The fun is 5 minutes then you realize after the game installation, it never ends. Good to see because I couldn't go around 400 with standard settings, it's just a matter of choosing a game, because I also understand hacking well! How to find the address and where to find a particular line? For example, you installed the game NEEW and wanted to change it. How to track gold source. Page 2 Hello everyone ...... If you like me and you just want to get silly out of the game that fools you sometimes, this is for you. This guide explains how to modify APK for FieldRunners HD. I will not deliver or distribute APKs, please don't ask. Thank you very much for this! I did it in Google Chrome! I also got this working with your guidance on my Transformer Prime! I wanted to do it with Android! I'm using titanium backup, so it's ideal to support the current version of Android Market! Then do that and go back to your normal state if I want to! Thanks for this leadership! I will definitely make a video and show you how to do it! Last Edit: August 31, 2013 Hi, I tried, but it still doesn't work. I can ask Fieldranner. Thanks æ æ æ ã ° ° .... Hello everyone, I'm a newbie and a bit shy of all this Solution, but I think this post I did good things (thank you very much). So, I changed the APK (Cash & Health) settings, but I can't find a way to tell the files. I was looking for a good article, but I got lost and maybe you will help me find useful information? Pulled android commander, tried to sign agriculture agent, but I can't find signed_apk if it looks like that...? If you compare it to your video, it's much faster than if you signed it. I'm looking for help, thanks. (And forgive me for my language, I'm French. Lol) Beginners, please help. Thank you very much for this! I did it in Google Chrome! I wanted a way to do it with Android! I'm using titanium backup, so it's ideal to support the current version of Android Market! Then do that and go back to your normal state if I want to! Thanks for this leadership! I will definitely make a video and show you how to do it! Please burn me.Return. Original settings above installation. I did in version 1.15. Everything was fine, the bus returned to the original and installed the settings. Do you have an idea? If anyone got it to work properly... could you please PM me and help. Thanks. The error appears during installation: "The program was not installed" and I did everything as you said ... I can't even find the APK through the Root explorer. Any idea where the ICS is? Has anyone tried something like this? I use Gamecih to get the money and edit the Lib file to unlock all the cars, but even with max cars the AI cars reach a point where they just can't beat them. I would like to modify the APK to slow down the hair. Maybe take them internally. Otherwise it's a great game. Posted from HTC One S via XDA Premium Wondering why bother swapping when you can just edit the game save file. It's much easier and mess-free with the program itself. This is how I got my temperature. SAV: Pull data ADB/data/com.subatomicstudios/files/temperature. I use the sixteenth editor to find a value that suits my money when I saved the game and added 240 (05 -> F5). Well, instead of replacing $5-$245, I did 245 bad, at least it wasn't the worst. You can use ADB Push Fix data.SAV/data/com.subatomicstudios/files/temperature/temperature/temperature I bought the game from Amazon if that was important. Response: Richtj99 and wwjahdew I'm wondering why worry about changing the APK file if you can just edit the game save file. It's much easier and mess-free with the program itself. This is how I got my temperature. SAV: Pull data ADB/data/com.subatomicstudios/files/temperature. I use the sixteenth editor to find a value that suits my money when I saved the game and added 240 (05 -> F5). Well, instead of replacing $5-$245, I did 245 bad, at least it wasn't the worst, so killing their score was pretty much the same. You can use adb pushfix sav data / data / com.subatomstudios / files / temp.sav if this is important, I purchased the game on Amazon. Is there a way to publish or send an e -mail? Via e -mail to save the game file? Yes, it is not modified here (temp3.sav) and modified (temp3a.sav) advanced version. If you make a series of recordings, the cutting of the file format must not be complicated, the limit is the sky. I really want this game to be broken and I can't take it! I tried all the combinations of Gamecih and I just can't do it in this game. I tried to find an apk on my device, but I can't find it! So I downloaded some and it seems that they all come from Amazon. I don't know how to use the Adb or Hex editor, so I won't even try Lol. What can I try now? Everyone wants to share their game, the game added to this thread is limited. Sent from my Nexus Prime. There are many games recorded and modified here for anyone interested. Double I only stressed that I managed to modify the HD Fieldrunners and that I received 15,000 money and 200 health in the video in the original post. There should be some things to notice: I could not do it with V1.20 (one with .Obb file) and small APK. Managed correctly to edit V1.15 (one with the size of the 36 MB APK file and the .obb file). It's just for information. I exploded !!! : Laughs: @op thank you very much, my friend. I really appreciate the effort. I simply emphasize that I was able to successfully modify the HD Fieldrunners and I got 15,000 money and 200 health in the video in the original post. Some points to keep in mind, I was unable to do it using the V1.20with the .OBB file) and a small apk. I managed to perform the v1.15 version correctly (with the size of the APK 36 MB file and without the .OBB file). This is just for your knowledge. Pleased to meet you!!! : Laughter: @op, thank you very much, my friend. Do you really appreciate Amazon's App Store's efforts? I can't work. I changed the file, I signed it, but the application is not installed. I tried to sign with the help of an original installation, it was established, but when I tried to start, the bombs. What.
